## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/23/2005 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Ginsburg (U.S. 4,873,978).

Note in figures 1-4 of patent to Ginsburg, a tubular member (12), wherein a filter (14) removably inserted through the lumen (24) of the tubular member (12); wherein an axis of the filter (14) can be extending perpendicular to an axis of the tubular member (12) (see figure 4); wherein the filter (14) capable of having a pore size (between lateral members (36)) of 50 to 300 microns and also can be

adapted to allow a blood flow rate of 3L/min or more through the filter (14); wherein the filter (14) having an apex (at 32) and an opening (at 30), the apex (at 32) of the filter (14) is distal the opening (32); and a shaft (22) disposed within the tubular member (12), wherein said filter which includes an expansion frame (34) mounted on the distal end of said shaft (22).

***Response to Arguments***

1. Applicant's arguments, see Amendment after final (with RCE), filed 05/023/2005, with respect to the rejection(s) of claim(s) 1-22 under Middleman et al (U.S. 5,720,754) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Ginsburg '978.
